Title:

Comments: Class 1 ebikes produce the same amount of power and speed as a Professional athlete. The frame geometry and its components are the same as a traditional pedal bicycle. The mechanical power advantage is similar to that of a hiker using trekking poles. Ebikes will allow the public to continue embracing a healthier lifestyle.

We are in a very important point in our national forests. With more people visiting and exploring the outdoors, education, resources, and enforcement will need to increase and balance the system.

Please give ebikes more access and please increase resources and staff to balance the usage of our forests.
