Comments: As a 64 year old with knee and shoulder injuries my E-MTN bike has changed my life. I fully support EMTN bike access to all trails on National Forest lands. I fail to understand why it has taken so long to accept non-throttle, pedal assist only bikes on all trails. My motor helps me climb steep trails and has no impact on how fast I descend. Please open forest service lands for all of us to enjoy. There is no evidence that EMTN bikes have any greater impact on trails. My EMTN bike is not a motor cycle.
