Comments: E-bikes allow riders off lesser skills to get onto terrain where they might not otherwise. This creates a safety issue for those riders and others on the trail. We are already seeing it regularly in Sedona where e-bikes are technically not allowed but are there every day, and nobody does anything about it. This shouldn't be about expanding access for everyone, it should be about managing access safely. There are so many opportunities for people already, allowing e-bikes will bring many complications as we are already seeing.
