Comments: I support the classification and inclusion of ebikes on non motorized trails.

Adopting a national standard and including ebikes will allow public access and recreation to all user groups. This is a big win for everyone.

Any concerns of user type or etiquette are not valid arguments to ban ebikes. Science has shown that ebikes do not cause further trail damage. Science has shown that ebikes are not any faster. Science has show that it is a clean human powered exercise. Follow the science and allow ebikes on NFS trails.

Anywhere that mountain bikes are allowed, class 1 ebikes should be allowed.

Thank you.
