Comments: Hello, I am writing to express my opinion that all public lands should allow class one e bikes to utilize these valuable public resources. Class one e bikes are pedal assist only, with no throttle, and cannot exceed 19mph. The impact created by these bicycles is no more impactful than equestrian or non e bicycle use. The e bike is a tool to allow average recreationalists to explore our public lands in a non impactful manner. These bicycles also allow the lowest impact form of trail maintenance to be conducted without the use of gas powered motors. Thank you for your consideration in this matter.
