Comments: I can only afford one bike. I have an ebike and I ride with friends who have regular bikes. I hope the new accommodations allow us all to ride together. This is the best way to get new riders interested in ebikes and promote cooperation. When I'm with a group of non-ebikes my riding behavior is identical to theirs with low power assist so we all climb together and descend together. It would be a real shame if we couldn't ride the same trails.
