Title:

Comments: As a lifelong mountain biker getting up there in age (mid 40's) I cannot support having e-bikes on non-motorized trails. I regularly ride bike parks, local trails and the backcountry and just can't seem to find a way their use is acceptable. They have no place on trails that are not meant for motorized use. The increase in climbing speeds and along flat sections and user conflicts they create are just not worth it. In an area that already has a tenuous relationship with hikers and horseback riders I cannot fathom how this would be a good choice. Please do not allow e-bikes of any kind on any non-motorized trails. Thank You.
