Comments: I urge the USFS to expand access of trails to class 1 and 2 electric bikes. These kinds of bikes provide access to many people who would otherwise not be physically able to use our trails. My father, who's now 72 years old and a lifelong lover of nature, is no longer able to physically pedal up mountain roads that he used to be able to. The only way he can, is through the use of e-bikes. We have gone on many green sticker trails with our e-bikes and it still gives him ability to go up and access trails. But most mountain bike trails are closed to ebikes. In terms of impact to the ground, they are not that different from regular bikes. They are NOT electric motorcycles despite what opponents claim. Please enable access to trails by permitting ebikes.
