Title:

Comments: As a traditional mountain biker I fully support class 1 ebikes being allowed on any trail I currently have access to. Since this technology has developed I have been able to ride with friends I never had the pleasure to before. In return I have watched as each of them purchased park passes and parking permits as well as volunteering with trail and park clean up days. Class 2 and 3i think should be relegated to motorized as they no longer require any physical input to move the vehicle. The 20mph limit is also reasonable as it's an attainable speed for most riders.
