Comments: I highly support giving Land Management officials the flexibility to allow specific classes of ebikes to use trails designated for bicycle use. Specifically allow class 1 ebike to use trails designated for bicycle use.

I have many years of experience riding mountain bikes on trails and have recently ridden numerous trails on a class 1 ebike. Class 1 bikes have the same impact on the trail as non-motorized bikes and allow access for individuals with physical issues that prevent them from using a non-motorized bike. To further clarify, I do not support the use of Class 2 or class 3 ebikes on trails designated for bicycles use. Class 2 ebikes can have a harder impact due to trail erosion, while the speed of class 3 ebikes is inappropriate for most multi-use trails.
