Comments: As a 74 year old life long taxpaying citizen, I feel there is no way I should be denied electric bike access to our public lands. It is the only means I have of enjoying the lands I have so long strived to protect from destruction and mutilation. It seems only fair that now that I am physically limited to powered transportation, a clean and noise free access would make our population appreciate and respect our public lands even more with access to this great treasure. Lets make it available to those unable to do it comfortably under their own power.
