Comments: I fully support the use of class 1 e-bikes where other types of bicycles are permitted. This allows a wider group of people to access public lands. Class 1 e-bikes do not harm the land more than other types of bicycles. As a matter of fact, they likely harm the land less as the riders are not experienced riders who are attempting to go as fast as possible down hill. It is the fast downhill riders that, due to significant braking and skidding, that cause damage to natural surface trails.
