Comments: Having ridden mountain bikes since my youth in the 80's it's a big part of my life and health. Having recently purchased an high end ebike (mountain bike) I've been able to form my own opinions about their affect and impact. I have experienced no difference to the trails I've always rode as far as impact. The main impact I've seen is how much more I am able to get outside and enjoy nature. Please consider making ebikes an accepted form of recreation wherever traditional bikes are allowed.
