Last name: Jordan

Organization:

Title:

Comments: I am an avid hiker in this area. People rolling down on a roller coaster will ruin hiking in the area. The noise pollution of their screams and the coaster alone will ruin hiking (the tranquility of the area). Also, the trails are fine as they are, don't move any. Don't turn a mountain into a toy. Skiing and cross country skiing and snow shoeing are ok as most don't hike in these super cold months. Sorry that the snows have not been good this year but don't introduce a ridiculous activity that does not even promote health or fitness and will be a blight visually, aurally and for all the senses, let alone the wildlife present. I cannot find one single benefit to this except ticket sales and it doesn't matter at all to me if it is a permitted use
