Comments: The stated purpose of allowing e-bikes is to provide more access, especially the elderly or disabled, to the trails. Therefore, The use of e-bikes on our trails should be limited to the elderly and disabled. Due to their speed and weight, e-bike access will put hikers and other users at risk. Limited e-bike access limits the risk; unlimited access will substantially increase the risk and will ultimately require separate trails for their use. I am an avid Mountain biker and hiker, and I love the e-bike revolution; however, safety is tantamount. Limiting e-bike use to the elderly and disabled on our trails strikes a reasonable balance.
