Title:

Comments: Due to age and limited physical abilities I 100% back the decision to allow Class1 e-bike on our National Forests and Public Lands. Having purchased an e-bike 3 years ago I find it benefits the physically limited, older enthusiasts. Personally I have bicycled on and off road since the 1980's. Having used the e-bike for the last 3 years I haven't noticed any significant degradation of my trail system, beyond what conventional bicycles inflict on them. There have been numerous times I have yielded to the more aggressive younger bikers. As for the down hill runs, age and experience leads to a more cautious rider.
