Title:

Comments: I support opening trails for ebikes that meet class 1 regulations. I understand the fears of MTB & Horseback groups. More access means more people. The answer is not excluding individuals because they may increase trail utilization and crowd the already limited trail networks. More trails are needed for all interested groups. I also would support limiting access by not allowing ebikes "everywhere". As a whole our nation is divided by politics and the very real divide in access to all things. I do not own and ebike, but my wife does. She has had two lower back fusions, two knee surgery's and suffers from rheumatoid arthritis. Not allowing her trail access in public lands I consider discrimination.

Please feel free to contact me at any time.

Respectfully

Travis Gilkey
