Comments: I fully support pedal assist e bikes on trails. I travel to the trail on my e bike causing less pollution then someone driving their vehicle to the trailhead . The bike does not cause more trail damage because of weight. My husband weighs more on his bike compared to me without the motor and you can't discriminate because of weight. The speed is the the same up or downhill as a normal bike. The trail maintenance and safety problems are with downhill riders going to fast not uphill.

I fully support pedal assist on all trails!!
