Comments: As a 60 year old man having had two total hip replacements, I thought my days for riding a bike through our beautiful forest and park trails were over. I purchased a Class 2 E-bike and it has opened up a whole new world for my wife and I. Most E-bike riders we have encountered ride them responsibly and while Class 2 bikes have a throttle available, we generally just use it to get us started and then exclusively use the pedal assist as needed to help us along. I strongly urge you to consider allowing these bikes to operate on any trail that allows normal bicycles.

Thank you for your consideration.
