Comments: This is horse crap. I have already seen ebikes on prohibited trails. I personally do not ride an ebike. I pedal my bike and if I have to walk a section I do. There is no shame in walking. I also get a lot of exercise by walking my dog. What kind of exercise will you get by having a motor drive you around the trails? NONE! There are plenty of other ways to experience the outdoors. Do not ruin our livelihood by allowing ebikes. They do not belong on outback trails or any heavily ridden singletrack/doubletrack trails where the operator may cause congestion when other faster pedal driven riders approach him/her and they panic or forget to take off the pedal assist and crash and harm themselves or others. I have already seen this happen. Do NOT allow this to happen by allowing ebikes.
