Comments: I am wholly opposed to ebikes being allowed on motorized trails.

The last thing the backcountry needs is the ability of folks to get there to become significantly easier. For a lot of reasons we have to draw the line somewhere, and motors are a good place to do that . E bikes quite literally have motors.

I encourage the Dept. of Ag to plan ahead, for increased use, strained resources, and technological advancements, and to keep ebikes where they belong and already have ample opportunity - on motorized trails and roads.
