Title:

Comments: Class 1 e-bikes should absolutely be allowed access to the same Federal and State lands, trails and facilities as normal bicycles. I am a senior citizen, and the use availability of an e-bike has changed my life. I can ride more often, for longer periods of time with an e-bike. Today's e-bikes are quiet, unobtrusive and pose no risk to any trail or land currently allowing traditional bicycles. I do not believe Class 2 and Class 3 e-bikes should be granted the same access.
