First name: Allen

Last name: Bodenhamer

Organization:

Title:

Comments: It began with dirt bikes, progressed to 4-wheelers, then side by sides--which have resulted in the destruction of much of our public lands in the West. Now you are considering turning these motorized bikes loose in the mountains and wilderness areas to destroy the trails and killing what is left of our wildlife. Possibly you should consider saving the rest of the land for the people who love it, pick up the litter and clean the trails for you in lieu of allowing them to destroy what is left of it.
