Title:

Comments: Hello,

I am opposed to allowing all classes of e-bikes on soft surface trails, unless those trails currently allow other forms of motorized travel, like motorcycles. These types of trails should be left for non-motorized travel so that the trails retain a quieter and more peaceful environment that hikers and most mountain bikers enjoy. This type of environment allows people to get away from the stress of the often fast paced, busy, and hectic feel of our paved streets in cities and suburbs. Allowing e-bikes would definitely detract from the peacefulness of these trails because of their higher speeds, zooming past hikers and self-propelled bicycles, especially on the uphill.

Thank you,

Chris
