Comments: As a current class 1 E-bike rider I would like to see the USFS allow class 1 E-bikes on all of the same trails that a normal mountain bike is allowed on. We shouldn't restrict access to the USFS trails to just the most physically fit people. Either by age or injury we all will eventually be on an E-bike if you enjoy riding. I currently ride trails around the Phoenix, Arizona area that E-bikes are allowed on and have really enjoyed the extra miles and rides that I can get in each week. I've gone from 1 10 mile ride a week to 3 20 mile rides. The extra exercise that I'm getting is making a huge difference to my health. The class 1 E-bike still requires the person to pedal for the bike to move.
