Title:

Comments: I have read most of these support letters. I don't understand the blatant lies. THESE MOTORIZED eBIKES wreak havoc on the trails they are allowed on already. Unfortunately, I agree there are many disabled or less able bodied Individuals that don't have the ability to enjoy some trails. Sadly, this isn't going to be the primary user. I've seen VERY able bodied users flying up hills and causing accidents and near accidents. This will just give the THE RIGHT to do it. Now, MTB groups like the one I'm in, use the trails for exercise and fun. If these eBikes are freely allowed access, there will be more accidents and the trails will pay the price.

Once my day is done for MTB and even hiking, I will sit back and fondly remember the fun times while I rest securely knowing I am not contributing to the loss of these beautiful resources for future generations to enjoy THE SAME WAY.
