Comments: I'm a stock holder in Midas Gold for the last three years. I was attracted to the investment not just to make money but the improvement it will make to the area. I'm a man that is very concerned about our environment. This project will restore and repair the area that was abused and damaged 80 years ago by previous operators. Frankly in my opinion its the areas only chance to be restored and repaired. There will also be about 600 new jobs created. That will really improve the area economy and help many poor people. The project will reduce the countries dependency on China for Antimony . Which is needed by the US government for defense . In short I see the project as must approval.
