Comments: I agree with others that e-bikes as they are defined in your proposed regulation modifications should be treated as bicycles. Most Negative comments that have been voiced here reveal a lack of accurate knowledge of these types of bikes. Concerns about noise, speeds, trail damage are unsupported by the available data. I have been riding bicycles and motorcycles off road for decades and more recently have adopted the use of e-bikes. They are not motorcycles. They simply allow bicyclists to go where bicycles are allowed with less effort. I encourage skeptics to visit a local bike shop and try one out. They simply put a smile on your face.
