Comments: I am for the use of class 1 ebikes to be used. I have biked for years but due to injuries I have gone to an ebike to have the ability to ride more than a couple miles at a time. In my years riding I have seen the positive affect the cycling community has had on rural areas bringing tourism. I have also seen the mass amount of volunteers it brings to maintain these lands and even improve them with things like water mitigation. Adding ebikes to this will increase these benefits by opening the land up to more of these people.
