Comments: I support the return of class one E-bikes to public trails within all National Forests so that I'm able to ride again with my father. My father has gotten older and has had a hip replacement making it harder to keep up with my brother and me. E-bikes serve as a way for riders to gain assistance rather than just "go fast." Of course going faster is the goal for my dad, except it's to keep up with his sons. I look forward to riding with my dad again on the trail!
