Comments: Hi I would like to urge the approval of class 1 ebikes on more Federal trail systems. In my 57 years (27 working in the healthcare field) I can not think of another invention from my lifetime that could do more to get people of all ages and BMI moving, fit, and healthy. The E-bike is the perfect solution for family members of different fitness levels to get out together. Unfortunately where I live, they are marginalized to our few motorcycle trails. While the motorcycle riders we encounter are usually friendly, we hope there would be more options for escaping the noise, fumes, and blown out trails we are relegated to. My wife has plenty of riding skills but can no longer handle the long climbs that are everywhere in our part of the world. I'm sure there are plenty more like her. The ebike just opens up so many opportunities for folks like them. Thanks for your time!
