Title:

Comments: I have been riding mountain bikes for over 25 years. I recently started riding electric pedal assist mountain bikes. As a disabled military veteran, I would not be able to enjoy the sport I love if it were not for electric pedal assist mountain bikes. These bikes allow thousands of American citizens to be able to recreate responsibly in our forests and lands. There is no evidence that these bikes pose any harm to the environment or any person, contrary to what some special interest groups might say. Please allow class 1 electric pedal assist mountain bikes and their owners the same opportunity to recreate responsibly on our federal lands. Thank you.
