Comments: Electric assist(class 1) mountain bikes should be allowed as any other bicycle would be. I have been an avid mountain biker for over 30 years. Only positive results come from allowing this new technology. Due to some injuries my traditional riding had mostly halted. I was able to demo an emtb, and very much being skeptical myself, was pleasantly amazed at the results. These bikes do not cause any more wear and tear on a trail system than a traditional bike. They have completely made me a mountain biker again. I have ridden more in the past month than I have in the last 2 years. I have been met with only kindness and curiosity when I show up at a trail with my new emtb. Please do not hesitate to open more territory for our use.
