Comments: please allow class 1 ebikes access to your lands. I have recently fell back in love with mountain biking after introducing my son to it. I have a bad knee that has kept me off the trails since my late 20s. I had the opportunity to rent an emtb on a family vacation this year. It was amazing what I was able to do. I rode all day with my son and was able to stand the next morning. I am hesitant on purchasing an emtb because of the lack of places I would be allowed to ride it. Please consider opening access to the trails on your land to class 1 electric mountain bikes.
