Comments: I am a life long mountain biker. When i was diagnosed with asthma. E-bikes has changed my life as now I can continue to enjoy one of my favorite sports. I can personally attest the ebike power actually causes less damage than a normal non electric bike. The power is applied in a smoother method thus no spin outs. The class 1 Bikes act essentially the same as a non electric bike. The ebike motor actually cuts out at 20 mph and performs exactly like a non electric bike. I respectfully request that class 1 ebikes be allowed in all locations that non electric bikes are. We are not interested in having any advantage over non ebike riders, just equal access. Thank you very much.
