Comments: Mid-Swan Project

This part of the Swan Valley does not need any "restoration". Please leave it alone.

What you are proposing is not viewed as a positive course of action.

Let the cycles of nature run its course.

Enough damage has been done in the last sixty years in that valley under the misguided name of management.

Please leave it alone. Certainly no more road building or old growth logging.

Explore sustainable, low impact logging if you must harvest.

Let science be the guiding principle of any decisions.

Thank you.
