Comments: To whom it may concern,

I am a long time bicyclist and mountain biker and current e mountain bike user. I am writing as an advocate of the use of e bikes on National Forest Land. These bikes are no different with respect to land impact as are regular bicycles. The weight difference is minimal and there is no increased wear and tear on the trails with these bicycles. Please feel free to contact me if necessary.

Sincerely,

Jeffrey S. Engelsgjerd
