Comments: I am taking this opportunity to comment on my support of allowing class 1 e bikes on Federal land. I am 70 years old, have been riding MTBs for 34 years. 3 years ago I was diagnosed with stage 3 cancer. While going through radiation, chemo for 2 years I was very low on energy and stamina. I decided to get an e mtb and keep on riding. It has been a game changer! i have also been a trail runner for 45 years logging approx 44,000 miles. sadly , I had to quit running. I also have been a motorcyclist for 56 years having raced professionally for over 20 years. There is no correlation between class 1 e mtbs and motorcycles, I still own 9 motorcycles ! The impact studies show virtually no difference between mtbs and e mtbs. I would appreciate a favorable vote in support of someone like me Thank you for your consideration!
