Comments: To Whom it may concern:

I ask that you logically consider that there is no appreciable difference between a standard pedal operated bicycle and a Class 1 ebike, as the Class 1 pedal-assist bike only assist the rider with the pedaling. There is no throttle, there is no difference in trail impact, speed, etc. The Class 1 ebike allows greater access to the outdoors for a wider range of citizens.

Thank you for your consideration.

Sincerely,

Bryan Schaap
