Comments: In light of the many environmental, societal and economic benefits that will derive from the SGP, I whole-heartedly encourage approval of Alternative 2 of the plan. Given the immeasurable negative consequences of past actions, both by industry and governmental agencies, with regard to management of our Nation's natural resources, it appears that this is a wonderful opportunity to right some environmental wrongs of the past while also providing much needed jobs and raw materials. As an avid outdoorsman who lived for several years in McCall, Idaho I believe that the overall net impact of the SGP will be found to be very positive in all respects. Thank you for your diligent efforts in considering this plan.
