Title:

Comments: Dear Forest Service, Please do not build a mountain coaster in the Sandias. While I like people to visit the Sandias and enjoy these natural wonders, I do not believe that the Sandias are a good place to build a coaster. I would prefer to see the national forest as a place that focuses on preserving habitat for wildlife and being a place that people can connect with nature. I think that having a coaster seems more like having an amusement park with screaming. What about the bears? The birds? The squirrels? The mountain lions? For wildlife, this is their only home. I feel like the world needs more places for wildlife and nature not less. I think there are plenty of other places for amusement parks.

Thank you for your consideration,

Sarah (Sarita) Streng, long term resident and citizen of Albuquerque
