Comments: I am 78 years old and love my eBike. The bike has given me great freedom. Riding responsibly is important whether on an eBike or MTB. I would challenge most anyone to ride an eBike faster on a single track trail than a person riding MTB. If you are worried about the bike damaging the trail, at 165 lbs and ebike at 50 lbs I don't weigh any more than lots of bike riders I see when out hiking. Why not limit ebikes to pedal assist only, (ie Class 1 and Class 3)
