Comments: Please extend use of Class 1 e-bikes to all trails where traditional mountain bikes are allowed. The current e-bikes are quiet, and Class 1 e-bikes are limited to 20 mph, with no throttle; you have to pedal to receive any assist from the motor. Many traditional bikes are ridden faster than 20 mph on level ground or downhill. There is still effort involved to pedal up a hill on an e-bike, it just makes it easier, thus allowing many of us to ride with our friends or spouses who may not be as limited physically. Allowing this would provide the opportunity to extend enjoyment of the outdoors to a wider range of riders.
