Comments: Thank you for taking the time to ask and read these responses. I'll make my comment short and sweet. I am not in favor of the Stibnite mining project. My reasons are very simple- I side with letting nature just be. Do I use products from mining and other forest products? Yes I do, but I don't have gold bars, it's mostly other metals, petroleum and wood products. I enjoy being out in the woods, exploring and I'd prefer to not see large mining trucks, more road repair construction projects and the like. That's all; my comment is very selfless for my benefit of someone who lives here and is raising a family in rural Idaho.

Thank you again,

TW
