Comments: I am opposed to the Pedlar River North Vegetation Project #58783. My concerns are sediment and ash in the streams that hold trout and supply our drinking water. I am opposed to killing flora and fauna as a type of management, and the smoke from controlled burns is a problem also. Controlled burns can get out of control. Leave the forests and streams as they are - we can't improve these beautiful areas. There are enough roads in the National Forests now, as well as many other signs of human activity.
