Comments: I am 63 years old and have a class 2 e-bike. We wouldn't ride a lot of trails because of the hills our e-bikes are our equalizer. Most problems with any bike are not the bike but the people who operate them. I've been passed by regular bikes that were going well over 20mph and there is no restriction on them. I also think 28mph has on a class 3 e-bike is too fast. These things are here they are popular and they are fun and they aren't going to go away. I'm in favor of class 1 and 2 e-bikes with the restricted speed of 20 mph.
