Comments: I 100% support pedal assist or class 1 ebikes on all trails that current traditional mountain bikes have access to. I would allowing these bikes on designated trails too, but that seems very cumbersome to figure out which ones and would get tangled up in years of ID teams to figure out. Open all Mountain Bike trails to Class1 ebikes like your partner agencies in DOI and the State DNR's have done. I do not support Class 2 or 3 ebikes on any dirt based trails, but do support them on flat or slightly inclined paved trails.

I ride a class 1 ebike currently and have accessed some USFS trails to ride with my family and friends who are not on ebikes. I am in my 50's and have extremely weak/bad knees. the Class 1 ebike allows me to still ride with them.
