Comments: As a horseback rider of trails whether they are service road or multi-use trails which exclude motorized vehicles, I am not in agreement with allowing the e-bikes use of the trails. Though I see the benefit for those unable to pedal without some kind of assistance by using an e-bike to take advantage of the outdoors like everyone else.

the concern is the "quiet" motors along with the the speed of which these are capable of. Horses may not sense these coming up ahead nor behind them which can can cause a very terrible situation for all involved.
