Comments: Riding on a trail with non-motorized bikes is dangerous enough because of the blind curves, single track and no where to get off the trail if you meet a bike on the trail or going downhill on a horse where a bike can also go downhill. Also, there are many rude disrespectful cyclists (in my experience 100% male in their 20's-40's). WHY WOULD YOU ALLOW A DANGEROUS SITUATION TO EXIST. WOULD YOU ALLOW TODDLERS IN A BIKE LANE ON A 3-WHEEL OR MINI BIKE ON A MAJOR ROAD EVEN IF THEIR PARENTS WERE NEAR BY BUT NOT HOLDING ON THEIR VEHICLES? By The way, I own/ride a road bike, mountain bike, cruiser bike and a stationary bike. I have ridden horses my whole life and I value my horse's life as well as my own. All it takes is a few seconds to go from enjoying a horseback ride to injury or death due to an encounter with a motorized bike and they usually ride away because they are not aware in the first place and/or have ear buds in their ears and do not hear you scream to please stop while you get safely out of danger! Plus, horse owners have invested much more money into riding horses than cyclist have invested in bikes and often horse owners pay more in taxes! PLEASE DO NOT KILL US OFF.
