Comments: I implore the USFS to allow the local land managers and the local communities to decide which trails, if any, are appropriate for the different categories of e-bikes. There are too many variables on the local level for blanket rules to be effectual in addressing e-bikes.

The worst thing that could happen would be for the inclusion of e-bikes on a trail or in an area to end up closing trails to all bicycles. E-bikes and traditional bicycles need to be managed separately and distinctly.

Thank you for your time and consideration.
